Python Practical 7 Oct 2021

1) Ques 8 from guidelines

2) WAP to remove duplicates from a list.

```
Input: 1 3  5  7  8  7  5
Output: 1  3  5  7  8
```

3) WAP to get a sorted list containing the difference between two given lists without using sets.

```
Input List 1: 2  3  6  1  7  9  11
Input List 2: 3  4  5  7  8  11  15
Output: 1  2  4  5  6  8  9  15
```

4) WAP to generate all sublists of a list.

```
Input: [1, 2, 3]
Output: [[], [1], [2], [3], [1,2], [1,3], [2,3], [1,2,3]]
```
